Rodon International B.V. is a Dutch based company. With a team of enthusiastic employees we have more than 30 years of experience in the poultry processing spare parts industry. Therefore we have become a reliable worldwide partner for this industry.

Our experience and knowledge of equipment enables us to adapt and customize parts to react to market needs and your specific demands. The wide and extensive range of OEM compatible parts, competitive pricing and high standards makes Rodon International a trusted partner in the business.

Rodon International is the one stop shop for poultry processing spare parts.

The divisible overhead conveyor cornerwheels are made out of corrosion resistance materials and can be executed with many different idler or toothed wheels. This results in a wide range of divisible cornerwheels, that can be used in all production areas.

Main advantages :

- Interchangeable with OEM and easy to replace
- 100% corrosion resistance due to stainless steel and synthetic materials
- Suitable for all diameters of cornerwheels and tension units
- Suitable for all brands of overhead conveyor systems
- Smooth operation due to multiple ball bearing system
- Easy to clean due to smooth surfaces, which results in low bacteria adhesion

To minimize your production downtime we can deliver many of our products directly from stock anywhere in the world. Products are continuously being developed and improved.

Material knowledge and modern production equipment in combination with the problem solving capabilities of our employees, continuously results in new opportunities. Rodon International is not only supplier of poultry spare parts but an active partner in your business.

It's our pleasure to serve you in all your spare part requirements.  
Please feel free to contact our head office or one of our regional business agents.
