

*Parts compatible with
GP Container Systems*

Rodon International B.V. is a Dutch based company. With a team of enthusiastic employees we have more than 30 years of experience in the poultry processing spare parts industry. Therefore we have become a reliable worldwide partner for this industry.

Our experience and knowledge of equipment enables us to adapt and customize parts to react to market needs and your specific demands. The wide and extensive range of OEM compatible parts, competitive pricing and high standards makes Rodon International a trusted partner in the business.

Rodon International is the one stop shop for poultry processing spare parts.

We have extended our range of products with redesigned spare parts compatible with live birds GP container systems. Usage of high quality raw materials combined with strict quality, production and assembly control ensures that the spare parts are efficient in performance and have a long lifetime thereby saving costs and replacement time. Our redesign of the container system parts allows for easy cleaning and less bacteria adhesion.

Material knowledge and modern production equipment in combination with the problem solving capabilities of our employees, continuously results in new opportunities. Rodon International is not only supplier of poultry spare parts but an active partner in your business.

It's our pleasure to serve you in all your spare part requirements.
Please feel free to contact our head office or one of our regional business agents
